

Now with  
installations  
in Canada

Real-time cow  
localization

Reliable heat  
detection

Rumination  
monitoring

Monitoring around  
the clock

Validated by the University of Kentucky and the University of Veterinary Medicine, Vienna.

## WHY EAR TAGS?

The SMARTBOW Eartag is mounted in seconds on the animal's ear. Measurements are especially accurate. It can be reused several times due to the replaceable battery. Your investment is secure.

## INTUITIVE USE

Even if you have an affinity for technology or are still skeptical towards computers, we will assure you that the use of SMARTBOW will be easy for you. Links to some Herd Management software available.

## FIRST-CLASS SERVICE

Our customer service will be glad to answer all of your questions. Via remote-maintenance, online support directly on your system is possible. On site you get personal advice by our qualified employees.

## Animal Health Starter System

25 Activity/Rumination ear tags  
All required Wallpoints (antenna's)  
Server (PC), 22" monitor with keyboard
